OMKAR BEHERA

Cyber Security Analyst | Penetration Tester

7325929062 | omkarcha6060@gmail.com | github.com/Omkar6060 | hackerrank.com/profile/omkarcha60601

PROFESSIONAL SUMMARY

Software engineer with hands-on observability experience, currently working full-time on in-depth Dynatrace implementation for multiservice application monitoring, spanning corporate IT architecture and defense-sector systems. Building web application security expertise through a completed TryHackMe certification and a PortSwigger Web Security Academy lab, with hands-on practice in Burp Suite, Wireshark, and Nmap. Proven track record improving system accuracy by 30%, reducing manual processes by 40%, and building AI-driven network and threat-analysis tools. Seeking to apply observability expertise and a growing, evidenced security skill set to a Cyber Security Analyst / Penetration Tester role.

CORE SECURITY & TECHNICAL SKILLS

Observability & Monitoring: Dynatrace (application performance monitoring, alerting, multiservice application observability), firewall log review, incident documentation

Security Testing Tools: Burp Suite, Wireshark, Nmap, Kali Linux, network traffic analysis

Offensive Security: Ethical hacking fundamentals, OWASP Top 10 vulnerability awareness; studying toward CEH/OSCP

Networking & Systems: TCP/IP, DNS, routing, Linux, Windows Server, corporate IT architecture, application maintenance & alerting

Cloud & Virtualization: AWS, VMware

Programming & Data: Python, Java, C++, SQL, Bash

Hands-on Learning: TryHackMe (certified), PortSwigger Web Security Academy (completed lab) — practical training in threat detection, vulnerability assessment, and offensive/defensive security

Other Tools: Git, Arduino, OpenCV, WordPress, Machine Learning

EXPERIENCE

Software Engineer — *APMOSYS Technologies* March 2025 – Present

- Monitor application performance, availability, and system health using Dynatrace, correlating alerts across corporate IT architecture to identify anomalies and potential issues.
- Implement in-depth Dynatrace observability for multiservice applications, covering distributed tracing, alerting configuration, and topology analysis.
- Support application maintenance and alerting workflows, triaging incidents and escalating findings for remediation.
- Collaborate with engineering teams to document monitoring processes and support system reliability and compliance efforts.

Intern — *DRDO, Ministry of Defence, Govt. of India* June 2024 – July 2024

- Developed a microcontroller interface for ammunition systems monitoring, improving data acquisition accuracy by 30% in a high-security defense environment.
- Engineered a radar range calculation interface achieving 95% accuracy under simulated battlefield conditions.
- Built a full-stack website with secure authentication, reducing manual report handling by 40%.

SECURITY TRAINING & PRACTICE (Self-Directed)

- Completed a TryHackMe certification and a PortSwigger Web Security Academy lab, building practical skills in vulnerability assessment and web application security.
- Hands-on practice with Burp Suite, Wireshark, and Nmap for network/web application security testing; studying OWASP Top 10 vulnerabilities and working toward CEH/OSCP.

KEY PROJECTS

- **NeuroSniffer** — AI-powered network traffic analyzer built in Python and Linux for live packet capture and analysis, directly applying skills relevant to network security monitoring.
- **Radar Range Calculator** — Developed a Python application improving accuracy by 25% and response time by 30% for defense applications.
- **Mental Health Prediction System** — Built an AI-based screening tool using ML and OpenCV facial recognition with 90%+ accuracy, including real-time emotion detection.

EDUCATION & CERTIFICATIONS

Bachelor of Technology, Computer Software Engineering
Parala Maharaja Engineering College, Berhampur

- TryHackMe — Certified; practical training in networking, threat detection, offensive/defensive labs
- PortSwigger Web Security Academy — Completed lab in web application security
- Cybersecurity Workshop — IIT Bhubaneswar (2023–2024)
- Data Analyst Certification — IBM (2024), Python & Excel | ESG Virtual Experience Program — Tata Consultancy Services (2023) | Beginning C++ Programming — Udemy, 80-hour course (2023)

ACHIEVEMENTS & LEADERSHIP

- Reduced debugging time by 25% and processed 10,000+ data points for actionable insights across defense and civilian applications; coordinated placements for 150+ students as Placement Coordinator, BIJU Patnaik University of Technology, raising company participation by 20%.
